### ***DWY Landscape Architects Coming to Your Living Room Featured in the Latest Book by Braun Publishers AG***

Sarasota, FL (June 2013) - DWY Landscape Architects turns 14 and celebrates with the release of a new “coffee table” book featuring a project. The 142 page hardcover book *Tropical Gardens: Hidden Exotic Paradises* by Manuela Roth is published by Braun Publishing AG, a German company specializing in architecture, design and urban development with more than 30 titles distributed internationally. A coastal modern residential project designed by DWY Landscape Architects owner and Principal David W. Young, ASLA, is highlighted in a four-page spread and appears on the back cover. The book includes designs by renowned landscape architects from around the world including projects in Thailand, Australia and the Bahamas.

Available for purchase through all major retailers at a suggested retail price of \$49.95, Braun describes the book by stating, “This volume presents exhilarating landscapes from all tropical regions of the world, displaying thrillingly ingenious arrangements of plants and trees. These are interspersed by pavilions, statues, bridges, and waterfalls that blend harmoniously with their enchanting surroundings.”

Founded in 1999 by Landscape Architect David Young, ASLA, DWY has enjoyed commissions ranging from modern waterfront estates to healing gardens and beachfront parks. What began as a small practice with a focus on residential design has evolved into a firm with a portfolio that also includes a world-renowned museum, campus master-plans, condominium developments and streetscapes. Born and raised in Florida, Young has a distinct perspective and inherent passion for native horticulture with a keen understanding of sustainable design.
